## PROFESSIONAL EXPERIENCE

---

### Web Developer | Adecho Technologies | Hybrid |Dec 2023– June 2024

Worked on three major projects focusing on frontend development using React.js, Tailwind CSS, and DaisyUI:

- **Avyan Enterprises**([Livelinek](#)): Built the full frontend of the company website from scratch in close collaboration with design and development teams to ensure responsiveness and user experience.
- **700 Form**([Livelinek](#)): Designed and developed the frontend interface and integrated APIs to manage data flow and application functionality. Using technologies like **React js ,Tailwind css,Daisy ui , Axios for api fetching**.
- **Adecho Technologies Website**([Livelinek](#)): Led the development of the company's website with a focus on branding, usability, and clean UI/UX.

## PROJECTS

---

### ContentFuel (React Native Expo, Express.js, MongoDB, Gemini AI API):([Livelinek](#))

- Built ContentFuel, a cross-platform mobile app using React Native (Expo), aimed at delivering AI-generated creative content ideas across different categories.Integrated Gemini AI API to dynamically generate personalized content ideas, enhancing the app's intelligence and content quality.Backend powered by Express.js and MongoDB, featuring user authentication ..

### Sales Helper (React.js &Tailwind Css):([Livelinek](#))

- CRM web application built using React.js and DaisyUI with features like: Add single and bulk leads , Import and export leads using Excel files,Manage tasks with a To-Do list and integrated calendar.

### Hackathon virtual round project at odoo (React js,Tailwind Css,Express Js,Mongo DB):([Livelinek](#))

- I participated in the Odoo Hackathon Virtual Round, working together from 9 AM to 5 PM to build and present a solution in just single day on topic StackIt is a minimal question-and-answer platform that supports collaborative learning and structured knowledge sharing. It's designed to be simple, user- friendly,and focused on the core experience of asking and answering questions within a community.

### Personal Portfolio Website (Next Js,Tailwind Css):([Livelinek](#))

- Designed and developed a personal portfolio website using Next.js and Tailwind CSS to showcase my frontend development and UI/UX design skills. Focused on creating a responsive, interactive, and clean user interface to highlight my projects.
